 Delivery the message

 Saskia: trend Report Open Data is available in English: <http://bit.ly/T51idf>

Open data movement on governments
Next year March there will be an update

Considerations

Open data is helping us

More public open data

Learn to communicate with armchair auditors

They like to play with open data

Kind of audit job

Skilled

Find a way to cope with that

New technology

Conclude

Rethink relevance

So many people use it

 Italy: Add quality to first conclusion

Help to cope with that new reality

Recommendations

 Italy

Important point

Quality open data

There are some risks

Underline quality of open data

Agree on format, underline: it is an openness

Monopoly of government info

If government opens their data, will the quality be the same?

 Italy

All kinds of open data, not only institutional

Discussion

We have responsibility on the data on our own website

There are tensions on quality of open data

Poland

Issue with external

External independent

Open formulation will help

Not on of our members

Independent review of modus operandi

Effective review

Self-assessment can be effective

Switzerland

We have links of friendship

Neutral independent advice

We are all family

Seek mediation from outside

Saskia

Effective, efficient and in good spirit

Tendency to self-applaud

Redraft

Culture & Leadership

Applause on paper
